

TEAMING UP TO TRIUMPH TOMORROW

#benjaminmazatis

THEREFORE MOTORSPORT!

Be Part of the Future!

Be a leader and invest in the future. Many innovations and new technologies are developed through motorsports. For example, synthetic fuels have been used in endurance racing for some time and this has led to the development of this technology.

High-Speed Networking Platform!

Be close to the action and find new business contacts by networking in VIP lounges with board members and top managers.

Accelerate your Performance!

Use my experience and winning mentality to help your employees to reach the next level. I am always available for lectures and presentations.

On the Road to Success!

Reward and motivate your best employees and your most important customers with an unforgettable experience when they are riding shotgun with me during a hot lap.

Events and Company Presentation!

Invite your clients to unique events or product presentations on and off the track together with myself and my racing car, branded in your corporate colours.

Strengthen your Media Presence!

Live broadcasts on television and the internet, together with postings on social media and reports in the press generate high level of coverage and engagement with fans and the media.

MORE THAN JUST A DRIVER

Michael Schumacher in Ferrari dominating formula one by winning five world championships in a row, ignited my passion for the sport and my need for speed. I became fascinated by Schumacher's accuracy to perfectly hit the apexes lap by lap combined with a very high corner speed.

Already at the age of six years, I Benjamin Mazatis raced with my Kart around racetracks and fought for every tenth of a second. I was rewarded with a lot of success and I became the youngest driver (shortly after my 13th birthday), to be invited to a Formula BMW test day in Valencia (Spain). I continued my success story and raced in Formula 4 in 2015 against such opponents as Mick Schumacher and Lando Norris. Whilst on the McLaren Academy I worked like no other and was awarded by the Formula 1 Team McLaren as the „Driver of Promise“. A few months later I successfully passed my A-levels. At the same time, I impressed everybody at a Formula 3 Test in Most (Czech Republic) but unfortunately, the missing financial support stole the show and prevented me from moving to the next level. That's why I switched to touring cars in 2016. I was immediately successful and won first time out at the difficult, dangerous and legendary Nürburgring Nordschleife. In 2017, I moved to GT-cars and won trophy by trophy starting with my first race at the 24h in Dubai right up to coming very close to the European GT4 title. Only technical issues stopped me 10 minutes before the end of the last race.

I continue to fight for perfection on, as well as off the track. As a student, I have a bachelor's degree and I am now on the last lap of my Master degree. It will be finished at the beginning of 2023. Driven by my thirst for knowledge and perfection I am also a qualified fitness instructor and personal coach.

”

I have already achieved a lot, but now I have the chance to achieve even more!

In 2023, I first want to return to Dubai to win the 24h race there. Later in the year I want to fulfil my childhood dream and start in the DTM, the highest German Motorsport series. To get there, I work hard every day in my simulator, in the gym, as well as on my mental strength.

But I need you as well to achieve these goals!

Let's have a meeting and discuss how we can team up to triumph together!

Become part of my team and my story to start with full throttle into a successful tomorrow!
